

SELF-TEST

## Testing has never been easier

**Meet the requirements of AS2293, without the need for an Emergency Timer switch, with the Ektor Professional product line.**

Ektor Professional Exit and Emergency fittings are designed to provide specifiers, building owners and occupiers with a cost effective and thorough means of testing Emergency and Exit luminaires individually and automatically.

The products do so in accordance with the mandatory requirements of Australian Standard AS/NZS2293.2 Section 3: Inspection and Maintenance Procedures for Single Point Systems. Self test devices can automatically perform your emergency testing requirements saving time and money.

### ONLINE EMERGENCY LOG BOOKS

Use the zencontrol Cloud to store and record your emergency test reports automatically. The Cloud is also able to provide site lifetime and reliability data.

### AUTOMATICALLY CREATE AND RECORD TESTS

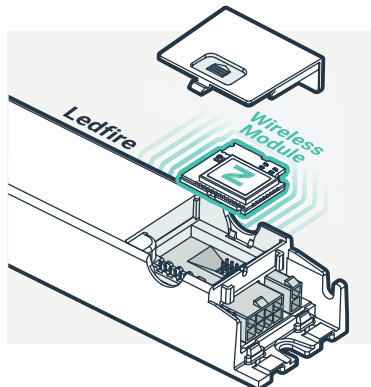

Share your test data so you can create your own reports, or utilise one of Ektor's pre-made templates.

### EASY RETROFITTING

Self testing requires no additional wires or systems making it easily retrofitable.

### WIRELESS UPGRADE

Upgrade any Ektor Professional emergency device to wireless with the addition of the zencontrol Wireless clip-in module, and get the most out of your emergency device.

**Ektor products are made to work with and perfectly integrated with the zencontrol Cloud system.**

### SYNC TO THE CLOUD

Sync and manage your sites online in a convenient tool box. Ensure your devices are working to the max and get information about lamp and battery life.

### AUTHORISED REPORTS

Add new devices to a building or add replacement devices easily while keeping the same test timings. Easily set the recharge and retest time when the battery needs replacement.

### AUTHORISED REPORTS

Get certified test reports guaranteed by us. Become a partner and verify the data automatically in the Cloud.

### GET THE IT NOW

Download the zencontrol android app and get the most out of your Self-test unit. The Commissioning Tool app extends the functionality of the self-test units and helps you meet the requirements of AS2293.

Understand the failure mode and best method of rectification. Manage all your sites from one easy to use user interface.
